**Southern California's premier provider of public transportation services offers a variety of shuttle service solutions. Let our dedicated professionals design a service to meet your needs today.**

Whether it's a lack of space to provide parking for an increase in your workforce, a need to provide transportation services for an off-site employee meeting, a way to get your employees the "last mile" from a Metrolink station to your office, or a need to provide transportation services for your employees, clients, or customers to an entertainment venue, TRANSPORTATION CONCEPTS has a solution that's sure to solve your challenge.

TRANSPORTATION CONCEPTS has been providing transportation service solutions to individuals, companies and government agencies in Southern California for the past 25 years. Our team of professionals can tailor a service to meet your unique needs that is safe, reliable and cost-effective.

## Off-Site Employee Parking

Providing enough space to accommodate the parking needs of your growing workforce is an ever increasing challenge in the Southland. More and more, companies are forced to provide off-site parking to accommodate these needs. Transportation Concepts can provide an easy and convenient solution to these off-site employee parking challenges by providing shuttle service to connect the remote lot to your office. Our professionally maintained and operated shuttle buses will safely and reliably transport your employees from an off-site employee parking lot to your offices on the frequency that you determine best meets your needs and the needs of your employees.

## Commuter Transit Connection

Many employees would use public transit such as the Metrolink service here in Southern California, if they had a convenient way to get between the Metrolink station and their place of work. Transportation Concepts provides this solution in the form of clean, comfortable shuttle buses that are waiting at the station when the train arrives and that return them reliably back to the station in time to catch their train home in the evening. Commuter transit connection services can be leveraged with other businesses in your area to provide a very cost-effective employee benefit and one that reduces the demand on your limited parking resources. Subsidies and credits are available to

many businesses through local air-quality agencies for qualifying trip reduction programs, such as an incentive plan to increase the number of employees who use public transit.

## Off-Site Meetings & Employee Events

Off-site meetings with employees and/or customers are an increasingly effective means of sharing information. Group transportation is a sure-fire way to maximize the effectiveness of these events and to avoid a number of potential problems as well.

Group transportation to off-site events insures that none of your participants get lost, that the participants arrive on-time, and that group communications and networking are facilitated by providing a stress-free environment on the way to and from the meeting for the participants to begin their dialogue.

TRANSPORTATION CONCEPTS' professionals can design a transportation program for your next off-site event that is sure to enhance the effectiveness and productivity of the session. Call us today to find out how.
